## SUBREAL

**Anne Sunila**

**22.4. - 10.5.2015**

The exhibition is part of my artistic project “City Places, Paris – Helsinki”. The painting process it induced has extended over several years and I have been working in both cities. The pieces strive to share a certain place, space, time and experience. They form a spatial wholeness.

As suggested by the title of the exhibition, “Subreal”, one may ask how the painting relates to the physical place? In the course of the working process this question has revealed itself to the painter in a multidimensional way, meeting the challenges of artistic research for my doctoral thesis. The works present themselves and the place of the viewer is open.
